

Gaurav Pandit

Full Stack Developer

+91 9575769452 | gaurav.pandit0399@gmail.com | LinkedIn | Portfolio | Indore, India

Summary

Full Stack Developer with 4 years of experience designing, building, and deploying scalable enterprise web and mobile applications using PHP, Laravel, Angular, React.js, React Native, Inertia.js, and MySQL. Strong background in backend architecture, RESTful API development, database design and optimization, Role Based Access Control (RBAC), workflow automation, payment gateway integration, and logistics APIs. Experienced in building low-code and configurable platforms, dynamic form engines, and audit logging systems. Recognized twice as Employee of the Month for consistent, high-quality project delivery.

Skills

Frontend: HTML, CSS, JavaScript, Angular, React.js, React Native, Inertia.js

Backend: PHP, Laravel, RESTful APIs, Microservices

Database: MySQL, Database Design, Query Optimization

Tools and Integrations: Git, Postman, Razorpay, Payment Gateway Integration, Logistics APIs

Other: Role Based Access Control (RBAC), Workflow Automation, Dynamic Form Engines, Audit Logging, Job Scheduling, Background Queue Processing, Excel Import/Export

Experience

Full Stack Developer

VidyaGxP Pvt Ltd

May 2024 – Present

Indore, India

- Designed and built enterprise-grade web applications, including a document and records management system and a configurable workflow management platform, using PHP, Laravel, and MySQL.
- Engineered a granular Role Based Access Control (RBAC) module with user-specific permissions and multi-admin support, strengthening access governance and reducing reliance on manual permission checks.
- Built a configurable dynamic form engine that renders user-defined fields, layouts, and validation rules at runtime, eliminating the need for hardcoded logic whenever a new form was introduced.
- Optimized MySQL queries and database indexing strategy, and improved REST API response times, resulting in noticeably faster page loads under high data volume.
- Developed an audit logging module that captures a complete, queryable history of user actions and data changes, making issue investigation and compliance reviews significantly faster.
- Implemented job scheduling and background queue processing for email notifications and bulk Excel import/export, removing manual data-entry bottlenecks and improving overall system reliability.

Mobile App & Web Developer

Devyani Technologies

Sep 2022 – Mar 2024

Indore, India

- Developed and maintained Angular-based web applications, integrating REST APIs for dynamic data handling and seamless frontend-backend communication.
- Integrated the Razorpay payment gateway for secure online transaction processing and a third-party logistics API for real-time shipment tracking, handling webhooks and status callbacks end to end.
- Built and deployed the Reminder mobile application using React Native, delivering a consistent UI and UX across iOS and Android from a single codebase.
- Collaborated with cross-functional teams in an Agile and Scrum environment, using Jira for sprint tracking and Git for version control and code reviews.

Projects

Quality Management System (QMS)

Laravel, MySQL

- Architected a multi-module, multi-tenant enterprise platform to digitalize document control, change management, and approval workflows, replacing fully manual, paper-based processes with a configurable digital system.
- Designed the backend architecture and database schema from scratch, supporting role-based permissions with multi-admin and multi-tenant access.
- Built RESTful APIs with request validation, structured error handling, and role-based response filtering to power the platform's frontend.
- Implemented job scheduling, background queue processing, and chunked data processing to support reliable bulk Excel import/export on large datasets.
- Added a digital approval and e-signature workflow along with an audit log module that tracks every activity.

Low-Code Admin Console

Laravel, React.js, MySQL, Postman

- Built a low-code admin platform that lets non-technical administrators configure forms, field validations, workflows, and page layouts through a UI, without requiring changes to application code.
- Designed a metadata-driven dynamic form generation engine in Laravel, paired with a React.js and Inertia.js frontend that renders configuration-driven UI components in real time.
- Built a single set of reusable, metadata-driven REST APIs capable of serving any configured module, reducing backend code duplication.
- Designed the underlying database schema to support dynamic fields, versioned form configurations, and validation rule storage.

Logistics & Transport Management System

Angular, API Integration

- Built a full-stack Transport Management System for managing consignments, vehicles, e-way bills, and subscription billing, with separate admin and customer-facing panels.
- Implemented core business modules, including Bilty, Challan, Vehicle Management, and E-Way Bill generation, with data validation and automated PDF document generation.
- Integrated the Razorpay payment gateway to support subscription plans, recurring billing, and online payment reconciliation.

Reminder App – Mobile Application

React Native

- Built a cross-platform reminder and task management application using React Native, allowing users to create, edit, and organize reminders with scheduled notifications from a single codebase.
- Implemented local notification scheduling for time-based and recurring reminders, with an emphasis on reliable, on-time delivery.
- Designed CRUD flows for creating, editing, and completing reminders, prioritizing a clean, intuitive, and distraction-free user experience.

Education

Bachelor of Computer Application

June 2016 – June 2019

Devi Ahilya University

Certifications

PHP Certification Course

TOPS Technologies, Surat

Achievements

- Employee of the Month Award (Twice) – recognized for exceptional project delivery at VidyaGxP Pvt Ltd.
- Successfully delivered multiple enterprise-grade applications on schedule and within scope across the organization.
